

Food & Beverage Processing Cleaners

## **Defoaming Egg Wash & CIP Cleaner**

## Core 3: Personal Attention

Every customer requires special attention and has their own demands put on them. Our staff will design and implement a program designed to fit your needs.

## Core 3: Experience

With our full staff of formulators, chemists, & marketing professionals we have been bringing cutting edge products to market for over 70 years.

## Core 3:Technology

Through daily contact with industry professionals, we are continuously updating and improving our products to make sure you perform at your best.

Synthetic Labs offers industry-leading solutions for businesses and professionals who demand exceptional results.

## EGG PROCESSING

# EW 1000

## Defoaming Egg Wash & CIP Cleaner

#### What is EW 1000?

A heavy duty cleaner for use in automatic egg washing machines. Eliminates the waste and performance-control problems typically experienced when using egg wash powders. Contains special defoaming agents to control foam caused from the cleaning process. Regular maintenance of the cleaning solution will drastically improve performance. Strong enough to be used as an equipment and facility cleaner. Highly alkaline which allows for very low dilution rates and allows for use as a CIP cleaner in multiple applications.

#### Benefits:

- Incredible non foaming formula.
- Highly concentrated for economical dilutions.
- Cleans and removes build up in one shot.
- Versatile enough to clean virtually any non aluminum surface.
- Can be used for boil-outs, soak tanks, and heavy cleaning applications.

#### Instructions:

For institutional or commercial use.

Before use, read product label and Safety Data Sheet.

Maintain a concentration of 0.10 to 1.0 oz per gallon of water in wash tank as necessary to maintain a minimum pH of 10.5. The use dilution required depends on the degree of soil and amount of egg breakage in the machine. Maintain wash water at a temperature that is at least 20°F higher than the egg itself, but not less than of 90°F. Do not use wash water containing greater than 2 ppm of iron. Follow washing with an approved sanitizing rinse. The temperature of the sanitizing rinse should be equal to or higher than that of the wash solution. Pack eggs only after they are completely dry.

## Tech Specs:

Color	Clear
Fragrance	Faint
Form	Liquid
Phosphates	None
FlashPoint	212F
рН	11
Specific Gravity	1.03
Viscosity	Thin
Foam	Low
Biodegradable	100%
Shelf Life	1 Year

Available Packages		
Available Fackages		
2890-275	275 Gallon Tote	
2890-55	55 Gallon Plastic Drum	
2890-30	30 Gallon Plastic Drum	
2890-15	15 Gallon Plastic Drum	
2890-5.25	2x2.5 Gallon Jugs	
2890-5	5 Gallon Plastic Pail	
2890-4	4 Gallon Case
