SOUR-SOFTENER

Sour Fluff

Neutralizing Fabric Softener

What is Sour Fluff?

A highly concentrated liquid sour developed to neutralize any alkalinity in the last rinse operation. By balancing the pH in the wash wheel, finished fabrics are softer and brighter. Helps combat tough iron and rust problems that might exist due to poor water conditions. Use in hotels, motels, hospitals, shirt laundries, nursing homes, etc.

Directions For Use:

For institutional or commercial use only. Before use, read product label and Safety Data Sheet. Consult your local Synthetic Labs Representative for specific use and setup instructions. If unsure of use or dilution of product, do not use until proper use is known.

This product is designed to be injected into machinery with laundry specific dispensing equipment. Do not pour this product directly onto dry fabric.
